

LM-BLEEPER-KIT-03 Information

The bleeper kit connects into our 9A4/9A8 off the shelf wiring harnesses fitted with 4-way Sureseals, as you can see from the photo. The bleeper only uses the ignition switched feed on Pin 1 and the Shift Light Signal on Pin 4 (please ensure that the shift light output is configured correctly on your ECU).

If you are using this bleeper kit without the use of our harness, you only need to connect pins 1 & 4 as detailed in the interface colours section.

INTERFACE COLOURS

Purple	(Pin 1)	Ignition (switched +12v)
Orange	(Pin 2)	Fuel Pump (+12v Out to pump)
Green	(Pin 3)	Taco
Blue/White	(Pin 4)	Gear Shift Lamp (switch Neg 0.25amp max)

Free technical support is available on our website. If you require personalised technical support training, this is available at a chargeable rate.
