

GEAR-PN-COMP-03K Wiring Information

Male connector for wiring harness

Connect the male connector that is supplied with the kit to your wiring harness.
The socket in the connector is for the 12v feed.

SureSeal connector:
Socket - 12v supply
Pin - Ground*

*Depending on your ECU set up, you may be controlling the 12v feed if using HSD (High Side Drive) or you could be controlling the Ground if using a relay and a LSD (Low Side Drive).

If you do not feel confident about undertaking the alterations, we would recommend that you contact an expert.

Free technical support is available on our website. If you require personalised technical support training, this is available at a chargeable rate.
